Prices are for divisions shipped prepaid; they are 20% less for delivery at the Garden, or on orders of \$10 or more.

A star indicates those we like best; N, originated in our Garden; S, by Dr. Stout; T, Dr. Traub. Figures give height in feet. Blooming season: i, very early; ii, late spring; iii, early summer; iv, midsummer; v, late. These data approximate.

These daylilies succeed under a great variety of conditions. They bloom from two to six weeks, from spring to late fall, nearly all colors and color combinations except blue and white. They are hard to kill. April and August are favored planting times. September is fine here except for spring blooming kinds.

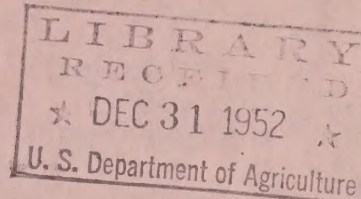

Visit our Garden about May 20 to see most early kinds in bloom; June 15, to see the Japanese iris garden. July 10 is the peak of bloom for the hundreds of kinds of summer blooming daylilies, and soon after, for the only lilies we have, *Lilium superbum*, wild among the iris. In mid-August our new late hemerocallis hybrids are in flower. But a visit each month from March to November is needed to see all our 2,700 kinds of plants in bloom.
